MobMart

Help us build a better payment app

A Message from our Founder

Written by Tariro Matanga

We want to build a payment app we wish existed. We will start to beta test our app soon and want you, our customer, to get involved right from the beginning! It's a chance to be mobile on Mobmart!

What happens next ?
We give you access to the beta version of our app. You will be able to load money on the app and shop, pay bills at participating stores. We are rolling out this test where MPESA and MTN Momo Money are available. Both IOS and Android versions will be available.

What can I do to help?
We are really keen to hear your feedback. Is it easier to shop with the app? What do you like about it? What don't you like? It is our version 1.1 of the app so there will be some bugs and fixes- your feedback will help make us better.

Great! I am keen what's the next step ?
Excellent! Sign up on our website and we will give you information on how you can be part of the very first group to try our app.
